

PRINTING

SPEED | TECHNOLOGY | CAPACITY | QUALITY

About Us

Printing is not just applying ink on the paper. It is a process that has many steps ranging from the correct printing of colours, to the correct processing of the paper, to the control of the design to meet the requirements of the desired product. Both the technological infrastructure and the experience must be top-notch.

Anyone can make mediocre or good products, but producing excellence requires a high level of know-how and investment.

Cyprus Printing Global was established with this vision in order to offer excellence and to do this with competitive prices.

Cyprus Printing Global, a subsidiary of Near East Technology, the largest technology company in Northern Cyprus, serves its customers with the quality-price-innovation triangle by following all the latest advances in the printing sector, which is developing every day in technological terms, together with the investments required for the largest printing investment in Northern Cyprus, taking into account the needs of our island.

Our printing house, believing in innovation and development, offers special solutions to its customers by understanding them better and working in a customer-oriented perspective with the principle of constant innovation.

Our primary goal is to increase domestic production with high quality and high variety in the printing sector in Northern Cyprus and to increase the competitiveness of our country by investing in machinery with high investment costs that change the price-performance ratio.

With its state of the art modern machinery park, our printing house continues to serve with the largest production area of our country and its wide service network, with its machines with high printing capacity, maximum quality and expert staff.

With our innovative and competitive structure, we offer you a solution partnership with our support based on the quality first and experience afterwards approach.

Why

Quality

Everything ranging from our designs, material selections, production techniques and technologies we use is aimed at keeping the quality at the highest level.

Research

We create different production techniques, material options and design concepts with ever changing technology.

Speed

The works are delivered in a fast and timely manner.

Warranty

CPG stands by its products. You can get information from our customer representatives regarding warranty periods.

Design

We implement your ideas in different media with our well-trained and creative design team.

Experience

You will feel the difference with our experienced and expert production staff.

Vision

Pioneering in our sector and reflecting our quality to our designs and products in the best way.

OFFSET PRINTING SOLUTIONS

Special colour
verification
solutions

We are undertaking the largest and most comprehensive printing investment in Northern Cyprus

Thanks to its high technology, we manage our quality and cost-oriented machine park with online systems from pricing to production via the Smart Printing System.

Upon your request, we apply techniques such as Metallic Gilding, Regional Lacquer and Embossing on papers branded with proven quality.

We will continue to offer you solution-oriented alternatives with the vision of doing the impossible and increasing domestic production opportunities for our national economy.

Just ask and we will find a solution

SPECIAL SOLUTIONS

Silver Foil Gilding

Foil gilding

We add value to your products with Gold, Silver and Rose Gold varieties, especially in your heavy weight works such as packaging, corporate identity products, and bags.

Gold Foil Gilding

Rose Gold Foil Gilding

Positive and Negative Embossing

Embossing

We customise your products by applying positive or negative embossing. For embossing to be effective, it must be applied on heavy weight items. It is especially used in files, business cards and box packaging.

Hard Cover

Book and Notebook covers, spiral table calendar, hard cover works, cardboard plastering and gluing machine is done automatically.

Pantone Colour

For your works that require precise colours, we offer you printing solutions with colours that you can choose from the pantone scale, ensuring consistent colour and the same colour at all times.

Regional Lacquer

It is the technique used to increase the effect of your designs such as catalogues, corporate identity products, packaging, and labels and to increase the richness of appearance. High gloss is achieved in localised parts of the design you desire. It is usually applied after matt cellophane is applied. It has plain, embossed and silvery options.

Conical Box Production

We produce your conical boxes such as hamburger, chips, take away service trays, noodle boxes with or without company-specific printing. We produce solutions with inner or outer craft, micro corrugated or food grade Bristol papers.

DIGITAL PRINTING SOLUTIONS

Laser and Inkjet solutions

We produce and deliver all kinds of digital outputs such as printing, photocopying, etc. from A5 to A0 with paper options from 80 gr to 400 grams in colour or black and white as per your request without any quantity restriction.

We produce your architectural printouts, posters or rendering printouts with the most advanced machine park in its field.

SPECIAL PRINTING SOLUTIONS

UV Flatbed

We produce products such as plexi, lighters, plaques, phone cases and similar products up to 15cm in height for all coloured applications, such as white + colour + varnish applications without any quantity limitation.

Laser Engraving

We apply your design to products such as metal, wood, leather, etc. with a direct laser beam.

Textile Printer

We are able to print directly on textile products. We apply your custom designs on your textile products such as T-Shirt etc.
